Certified Professional

Title: Oracle Data Manipulation,  
Knowledge Discovery &  
Reporting Using MS Access

ISBN: 0-9770739-1-2

Everything in this book is covered in a step by step manner by first building reader's concept using analogies, real world examples and then taking him/her to the steps of design implementation. The examples are based on **MS Access 2003** and Oracle 9i/10g but the concepts are equally good for other versions of MS Access and Oracle.
